# ADMIN PORTAL
# DETAILED INFORMATION SCREENSHOT

## ADMIN PORTAL DESCRIPTION:

It deals with all the back-end data generation and product information. The role of the admin is to:

· Authorize the user

· Grant access to user

· Enable/disable the user

· Authorize the Cheque Book requests User Authorization:

After successful registration on the user portal the user waits for the confirmation mail from the admin for his/her registration. The admin verifies the data given by the user and upon verification, the status is sent to user's email which is provided by the user at the time of registration. Only upon successful verification, the user's account wi I get

activated, the account number gets generated and he/she can proceed with banking activities. In case of failure, user has to re-register by providing the correct data. The admin also has a login to view the user details and perform actions accordingly

Access Granting•

The admin must set the transaction rights for the user. The three transaction rights are:
- Credit — User is allowed only to deposit.
- Credit + Debit — User is allowed to deposit and withdraw money. • Credit + Debit + Transfer — User is granted full transaction rights (i.e) he/she can deposit, withdraw and also perform transfer of money to other account holders

User Registration

1) Registration:

The registration is the first step to get started with the application. The user will have to enter his first name, last name, email, phone number, address, username, password,

date of birth, and an select an identity card (Aadhaar card, pan card or voters id) and enter its number and the scanned copy of the identity provided. If the username given by the user is checked for duplication in the database if a similar username exists then he or she will have to register with a new username. On registration the user information is passed on to the admin for verification. Once the admin verifies an email will be send to the user that his/her account is activated and a primary and saving account is created for the user
